

Rey Rameses Jude III S. Macalutas

System Developer | Full-Stack Web & Mobile App Developer

Malaybalay, Bukidnon, Philippines | +63 9940090476 | macalutasreyramesesjudeiii@gmail.com

github.com/rrjmac026 | linkedin.com/in/reynameses-jude-iii-macalutas-751a16405

PROFESSIONAL SUMMARY

System Developer with hands-on experience building full-stack web, desktop, and mobile applications across academic, enterprise, and government contexts. Proficient in Laravel, PHP, JavaScript, TypeScript, React, C#.NET, Flutter, and Node.js, with a strong background in multi-tenant architecture, database design, and agile development. Delivers scalable, secure systems, from university election platforms to gamified learning tools and restaurant management solutions.

SKILLS

Languages: PHP, JavaScript, TypeScript, C#, Dart, SQL

Frameworks: Laravel, React, .NET (WPF), Entity Framework Core, Flutter, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB

Architecture: Multi-Tenancy, RESTful APIs, MVC, MVVM

Mobile Development: Android Studio (Native Android), Flutter (Cross-Platform)

Tools: Git, GitHub, Docker, Composer, npm, QR/Barcode Scanning, Real-time Sync

Other Skills: Video Editing, Hardware Troubleshooting

WORK EXPERIENCE

Freelance Full-Stack Developer (Commissioned Project), Damulog LGU, Philippines

Jun 2026 – September 2026

- Developed the Damulog Legislative Information System (DLIS), a records-management system for tracking local government ordinances, delivered as a Windows desktop app (C#, WPF, .NET 10) and a web app (React, TypeScript, Laravel) sharing one PostgreSQL database
- Built ordinance management with amendment, supersession, and repeal tracking, status management, and relationship linking between ordinances
- Implemented role-based access control, audit logging, full-text search with filters, PDF document attachments, and print-ready reports

System Developer Intern, Provincial Engineer's Office, Malaybalay City, Bukidnon Philippines

Feb 2026 - May 2026

- Developed the PEO Management System, a web application for [what it manages], using [tech stack]
- Designed the database and built features including [module 1], [module 2], and [module 3]
- Implemented [roles, reports, authentication, etc.] to [result, e.g. replace manual paperwork, speed up processing]
- Collaborated with office staff to gather requirements, test the system, and [deploy / present it]

PROJECTS

PEO Management System (2026) Laravel, Docker, JavaScript, MySQL, PHP

- Developed a management system for the Provincial Engineer's Office during internship, awarded a Certificate of Recognition. [What it manages and key features]

DLIS - Damulog Legislative Information System | C#, WPF, .NET 10, React, TypeScript, Laravel, Docker, PostgreSQL

- Built a desktop and web application sharing one database for tracking local ordinances, with amendment and repeal history, role-based access, audit logging, search, and reports.

SCMS - Student Counseling Management System | Laravel, PHP, MySQL

- Built a web system for managing student counseling sessions, records, referrals, and counselor scheduling within an academic institution.

GAS - Gamified Accounting System | Laravel, MySQL, JavaScript

- Developed an interactive accounting learning platform with points, badges, and leaderboards to improve student engagement and comprehension.

TCMS - Training Center Management System | Laravel, Multi-Tenancy, MySQL

- Built a multi-tenant platform to manage courses, enrollees, trainers, and certifications, with isolated environments per institution.

BukSU Comelec Voting System v1 (2025) | Laravel, Docker, PHP, MySQL

- Developed the first version of BukSU's official online election system for secure digital voting in student government elections, with real-time results and voter authentication.

BukSU Comelec Voting System v2 (2026) | Laravel, Docker, PHP, MySQL

- Upgraded the election system with improved security protocols, enhanced UI/UX, advanced audit logging, and expanded reporting.

BukSU Comelec Mobile App | Android Studio, Node.js, Firebase

- Built a native Android app for BukSU Comelec operations enabling mobile access to election management, voter verification, and live result monitoring.

Dineflow - Restaurant Management System | Laravel, Multi-Tenancy, MySQL

- Built a multi-tenant platform with menu management, order processing, and table reservations, with isolated environments for each restaurant client.

SPTA Scanner - School Parent-Teacher Association Scanner App | Flutter, Dart, Android

- Developed a Flutter-based Android app using QR/barcode scanning for automated attendance tracking, with real-time data sync and report generation.

EDUCATION

Bachelor of Science in Information Technology, 2019 - 2026

Bukidnon State University (BukSU), Malaybalay City, Bukidnon

Graduated: June 19, 2026

- Relevant coursework: Web Systems, Database Management, Software Developer, Mobile Application Development
- Active contributor to BukSU Comelec digital transformation initiatives

CERTIFICATIONS AND AWARDS

- Certificate of Recognition, Provincial Engineer's Office, 2026 - awarded for developing the PEO Management System during internship
